

HOME TECHNOLOGY

Let's make it simple.

In this busy world, who wants to spend time juggling remote controls, fighting wireless networks, or running around turning off lights? Eheart Interior Solutions offers easy-to-use technology packages for your home that enhance your lifestyle, and make things a lot simpler.

Home theatre

Three distinct elements – display, audio, and environment – combine to create the movie theatre experience in the comfort of your home. Let an Eheart designer help you create an environment that offers a new level of viewing pleasure.

Security

A security system is designed to be a deterrent to the unwanted guest. Systems can track door and window entry, movement within a building, and glass breakage, thereby protecting your investments and creating a safer home for your family.

Networking

Home networking includes wiring for telephones, television, Internet, MP3 players, wireless hot spots, and more. Enable multiple computers to access the Internet and connect to each other. With a home network, you can even watch the same DVD on more than one TV at the same time.

Audio

Add a music server, MP3 dock, and speakers to multiple rooms in your house and groove to your music wherever you go. Select your music using an in-wall touch screen, LCD list, or handheld remote. Explore different music from room to room, and create the atmosphere you're listening for.

Video

Say goodbye to cluttered shelves of DVDs and VHS tapes. Video servers do for movies what audio servers do for music – make them easily accessible. Select your movie from an onscreen menu instead of the shelf, and then watch it on whichever TV you'd like.

Video surveillance

Stay informed about the world around you. Keep an eye on children playing in the backyard while you make dinner. See who's at the front door without leaving the comfort of your couch. You can even identify who's been to or in your house while you weren't home. Keep surprises away from your personal sanctuary – there's no such thing as too much peace of mind.

Lighting

Make the most of any lighting package with a lighting control system. Set the mood in a room with a push of a button. Forget to turn off the light when you left your bedroom? Take care of it when you get to the kitchen. Save money on landscape lighting by dimming the lights and setting timers. Take greater control of your lights – and your electric bill.

Central vacuum

More powerful than any upright, a central vacuum exhausts dust and dirt outside the home, so allergy sufferers can rest easier. The additional convenience and noise reduction of a central vacuum system makes it even easier to keep your home clean and beautiful for years to come. Stop hauling your vacuum up and down the stairs. Consult an Eheart designer to find out how efficient, dependable, and clean a central vacuum system is.
